

Big Capacity Tube Ice Machine

Big Capacity Tube Ice Machine

The capacity of Focusun Tube Ice Machine ranges from 5T/24 hours to 40T/24 hours. Our tube ice machine is both used in customer consuming and cooling systems, and it's also widely used in restaurants, fast-food stores, supermarkets, healthcare centers, schools, Night clubs & bars, meat plants etc.

This big capacity tube ice machine is environmentally safe, using Freon or Ammonia refrigerant. All surfaces that contact with water (including the cover) are stainless steel.

Salient Features of Big Capacity Tube Ice Machine:

- Capacities offered: 5,000Kgs/24H to 40,000Kgs/24H.
- Simple design/engineering.
- No requirements of skilled workers.
- High durability, minimal maintenance.
- High energy efficiency.
- Complete spare parts provided.

Machine Components of this Big Capacity Tube Ice Machine:

- SS304 stainless steel tube ice machine
- Water Distributors: made up of elastic material which creates a continuous and uninterrupted peripheral seal between the tube ends and water distributor.
- Refrigerant: R22/R404A/Ammonia.
- Freezer: high quality stainless steel for all water and ice contacting surfaces which are corrosion resistant and easy to clean.
- Cutter: Stainless steel cutters driven by gear motors are uniquely designed to produce both cylindrical and crushed ice simply by reversing the motor of cutter and using a switch on the control panel that controls this function.
- Cutter Motors: Built with heavy duty design to give years of reliable ice-cutting service

- Pumping Tank (Water Pumps): Centrifugal casting iron pump is large enough to circulate the quantity of water to be frozen for many times and produce crystal clear ice.
- Control Panel: access to the automatically electrical system which performs sequences of freezing and thawing precisely and dependably year after year.

Please [mail us](#) your order with the capacity, including the temperature of the water in your area. Our professional engineers will get in touch with you in 2 working days.

Technical Data

Model	Daily Capacity	Compressor	Wattage	Refrigerant	Power Supply
FIT50	5000kg	Bltzer	15kw	R22/R404A	220V/60HZ,380V/50HZ,
FIT100	10,000kg	Bltzer	32.75kw	R22/R404A	220V/60HZ,380V/50HZ,
FIT100	15,000kg	Bltzer	37.5kw	R22/R404A	220V/60HZ,380V/50HZ,
FIT200	20,000kg	Bitzer/Grasso	56.6/45.3kw	R22/R717	220V/60HZ,380V/50HZ,
FIT250	25,000kg	Bitzer/Grasso	67.8/53.4kw	R22/R717	220V/60HZ,380V/50HZ,
FIT300	30,000kg	Bitzer/Grasso	85/62.8kw	R22/R717	220V/60HZ,380V/50HZ,
FIT400	40,000kg	Bitzer/Grasso	113.2/81.7kw	R22/R717	220V/60HZ,380V/50HZ,
