

Home Ice Cream Machine

Home Ice Cream Machine

Focusun® Home Ice Cream Maker now makes ice cream at home free from labor-intensive. It is an automatically electric ice cream maker, making a batch of homemade ice-cream within only 30 minutes. Focusun homemade ice cream maker is a necessary residential machine for household frozen dessert making.

Features of this home ice cream machine:

1. This self-contained home ice cream machine is equipped with two bowls. The stainless-steel outer bowl is for making in batches while removable interior bowl is for easy storage and cleaning.
2. The transparent lid on the top of the machine makes it easy to monitor your dessert making and add ingredients
3. You do not need to freeze the bowl for hours in a freezer in advance; this portable ice cream maker has a built-in freezer. This built-in refrigeration function offers much convenience.
4. Digital timer of 10,30,40,50 minutes to choose different operating time according to your preferred taste. The home ice cream maker will automatically stop when the ice cream finishes making. You don't have to worry any more to check the operating status now.
5. If no one seems to serve the ice cream or turns off the machine, the home ice cream maker automatically enters into an "Extended Cooling" status to keep the ice cream already made not defrosted.
6. Break off operation: You can stop the ice cream machine by pressing the STOP button whenever the machine is running.
7. Adding operating time: When the preset time of 30 minutes is over, you can restart the machine by selecting continuous operating time to continue chilling for your perfect taste. Whether soft or firm texture, it's up to you.
